

Hi, I'm Paulo Giusti.

Experience

LEAD SOFTWARE ENGINEER Nov 2019 - Current

Lemon Energia, São Paulo, SP Brazil

Led the frontend chapter, taking charge of designing and executing the recruitment and onboarding processes. Additionally, I played a pivotal role in architecting Single Page Applications (SPAs) and Server-Side Rendered (SSR) projects using React and Remix on AWS. Moreover, I actively contributed to the maintenance and enhancement of various libraries, including the Design System. Functioned as the Tech Lead for the acquisition and growth application development, actively participating in frontend development tasks and overseeing the team management.

Assumed the position of Tech Lead for the company's internal platform development, providing leadership and expertise in both frontend and backend (Node JS) architecture. Furthermore, I collaborated closely with stakeholders, assisting in requirements management and product development.

FRONT END SOFTWARE ENGINEER Sep 2018 - Oct 2019

Gympass, São Paulo, SP Brazil

Developed the sign-up and web login features, enhancing the user experience and streamlining the onboarding process.

Developed the UI components library using React, enabling faster and consistent front-end development across the organization.

Demonstrated strong leadership skills by leading the front-end chapter, fostering collaboration, knowledge-sharing, and creating an environment conducive to innovation and excellence. Leveraged my expertise in architecture and development to create a Slack bot deployed on AWS Lambda, optimizing communication and automating tasks for the team.

LEAD FRONT END DEVELOPER Jan 2018 - Jun 2018

Meiuka Design, São Paulo, SP Brazil

Led the conceptualization, design, and implementation of Printi's UI components library using React. Developed Printi's UI library staging server, leveraging Node.js, to facilitate efficient testing and deployment of new features and enhancements.

Played a pivotal role in designing and implementing the company's servers on AWS cloud, skillfully utilizing Docker to manage the following services: Nginx, Gitlab with Continuous Integration for streamlined development workflows, and Node APIs.

FRONT END SOFTWARE ENGINEER Apr 2017 - Dec 2017

Cubo Mentoring | Consultoria | Treinamentos, São Paulo, SP Brazil

Designed and implemented the refund appeal feature on Amil's portal, using Angular 2.0. This feature streamlined the refund process and improved customer satisfaction.

Took charge of implementing and maintaining the attendance registration feature on Amil's portal utilizing Angular.

WEB SOLUTIONS SPECIALIST Jun 2015 - Oct 2015

Salesforce, Antwerp, FL Belgium

Implemented the pipeline dashboard feature on the Salesflares app using NodeJS and AngularJS. Developed salesflare.com website with Bootstrap3 and AngularJS.

SOFTWARE ENGINEER INTERN Dec 2013 - Mar 2014

ScytI, Brasília, DF Brazil

Implemented a feature to customize file access on Oak's Portal de Assinaturas using C# and AngularJS.

Implemented Portal de Assinatura's style templates for several customers, like Certisign (por-taldeassinaturas.com.br), using Bootstrap and AngularJS.
